GO Enrichment — Pairwise Shared Orthologs
GnA
GnC
AnC
signal transduction
translation
spermatogenesis
ubiquitin-dependent protein catabolic process
vesicle-mediated transport
protein glycosylation
proteolysis
viral process
protein transport
integral component of membrane
motile cilium
nucleus
plasma membrane
cytoplasm
calcium ion binding
RNA binding
serine-type endopeptidase inhibitor activity
carbohydrate binding
metal ion binding
lipid binding
structural molecule activity
catalytic activity
