

Biological Process

***		***				oxidative phosphorylation
***		***				ribonucleoside triphosphate metabolic process
***		***				purine nucleoside triphosphate metabolic process
***		***				purine ribonucleoside triphosphate metabolic process
***		***				ATP metabolic process
***		***				purine ribonucleotide metabolic process
***		***				purine nucleoside monophosphate metabolic process
***		***				purine ribonucleoside monophosphate metabolic process
***		***				ribonucleoside monophosphate metabolic process
***		***		***		purine nucleotide biosynthetic process
***		***		**		energy coupled proton transport, down electrochemical gradient
***		***				ATP synthesis coupled electron transport
***		***				mitochondrial ATP synthesis coupled electron transport
***		***				mRNA metabolic process
***		***				nuclear-transcribed mRNA catabolic process
***		***				mRNA catabolic process
***		***				positive regulation of telomere maintenance
***		***				protein modification by small protein removal
***		***				RNA processing
***		***				ncRNA metabolic process
***		***				regulation of DNA biosynthetic process
***		***				regulation of telomere maintenance via telomere lengthening
***		***				regulation of telomere maintenance via telomerase
***		***				positive regulation of establishment of protein localization to telomere
***		***				regulation of protein localization to chromosome, telomeric region
***		***				positive regulation of protein localization to chromosome, telomeric region
***		***				regulation of establishment of protein localization to telomere
***		***				regulation of establishment of protein localization to chromosome
***		***				regulation of telomere maintenance
***		**				aerobic respiration
***		**				mitochondrial respiratory chain complex assembly
***		**				NADH dehydrogenase complex assembly
***		**				mitochondrial respiratory chain complex I assembly
***		*				mitochondrial electron transport, NADH to ubiquinone
***						protein modification by small protein conjugation or removal
			***	***		cilium assembly
			***	***		plasma membrane bounded cell projection assembly
			***	**	*	non-motile cilium assembly
			***			protein localization to cilium
			***			axonemal dynein complex assembly
