

Protein domain

***		***				PF00227 Proteasome subunit
***		**				PF00106 short chain dehydrogenase
**		**				PF16450 Proteasomal ATPase OB C-terminal domain
**		**				PF00458 WHEP-TRS domain
**						PF00076 RNA recognition motif. (a.k.a. RRM, RBD, or RNP domain)
**						PF00684 DnaJ central domain
**						PF01399 PCI domain
		**				PF03144 Elongation factor Tu domain 2
		**				PF03953 Tubulin C-terminal domain
		**				PF00091 Tubulin/FtsZ family, GTPase domain
		**				PF00009 Elongation factor Tu GTP binding domain
			***	**		PF00042 Globin
			**		*	PF02886 LBP / BPI / CETP family, C-terminal domain
			***			PF00168 C2 domain
			**			PF03815 LCCL domain
			**			PF00050 Kazal-type serine protease inhibitor domain
	**				***	PF08686 PLAC (protease and lacunin) domain
	**				***	PF00041 Fibronectin type III domain
	**				***	PF19236 ADAMTS cysteine-rich domain
	**				**	PF19030 Thrombospondin type 1 domain
					***	PF09258 Glycosyl transferase family 64 domain
					**	PF07679 Immunoglobulin I-set domain
					***	PF17857 AAA+ lid domain
					***	PF12780 P-loop containing dynein motor region D4
					***	PF12781 ATP-binding dynein motor region
					***	PF03028 Dynein heavy chain region D6 P-loop domain
					***	PF12775 P-loop containing dynein motor region
					***	PF12774 Hydrolytic ATP binding site of dynein motor region
					***	PF18199 Dynein heavy chain C-terminal domain
					***	PF12777 Microtubule-binding stalk of dynein motor
					***	PF18198 Dynein heavy chain AAA lid domain
					***	PF17852 Dynein heavy chain AAA lid domain
					***	PF00652 Ricin-type beta-trefoil lectin domain
	***					PF09175 Vitellinogen, beta-sheet shell
*	**					PF09172 Vitellinogen, open beta-sheet
	**				*	PF00135 Carboxylesterase family
	**				*	PF00090 Thrombospondin type 1 domain
	**					PF07474 G2F domain
	**				*	PF07645 Calcium-binding EGF domain
	**					PF00092 von Willebrand factor type A domain
